# The water footprint of Ukraine's agricultural sector and reporting according to sustainable development standards

Doctor of Economics, Professor Skrypchuk P.M., 096 22  
50 350 petroskrypchuk@gmail.com

## Types of work (possible expansion and specialization):

- understand the geographical distribution of the water footprint for agriculture;
- assess water use efficiency: consumption and pollution, sustainable reporting;
- identify the most appropriate strategic actions to improve sustainability, efficiency, and accountability in sustainable reporting and water footprint in agribusiness..
