HEALENAE
HEALTH AND ENVIRONMENT IN AFRICA AND EUROPE

HEALENAE Training Partners

HEALENAE Research Objectives

1. To produce qualitative, fieldwork-based **knowledge** on experiences of intersections between health and environmental changes

2. To determine new kinds of **expertise** needed for the intersected and intercontinental fields of environment and health.

3. To **communicate** knowledge generated about interlinkages between health and environment, and between Africa and Europe.

4. To develop transdisciplinary **methods** and approaches to investigate intersections between health and the environment

HEALENAE Training objectives

1. To create a Doctoral **Network and field of excellence** in the anthropology of health and environment in Africa and Europe between universities and partners

2. To **educate** 15 top Doctoral Candidates to produce excellent, relevant and critical policy-engaged research addressing interlinked health and environmental problems, connections and possibilities in and across Africa and Europe.

3. To **disseminate** research findings in PhD theses, publications, videos, podcasts and an interactive online platform (HEALENAtlas)

Four HEALENAE pillars

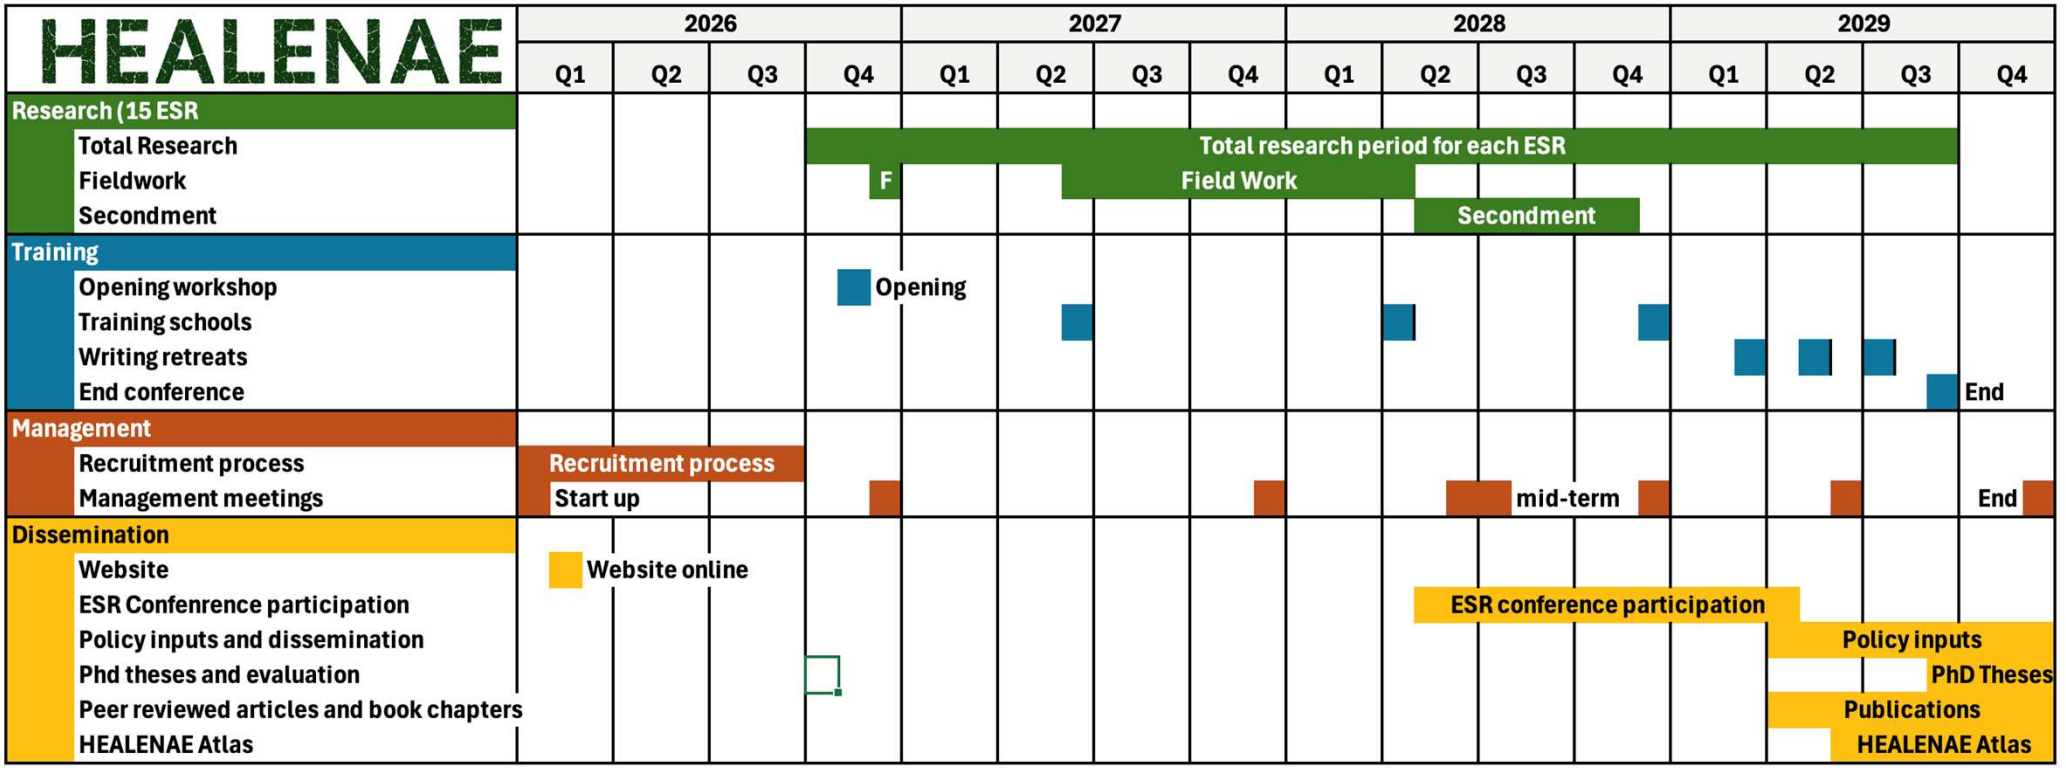

1. **Training**: Development of theoretical, conceptual and methodological approaches, critical, regional, historical and interdisciplinary analysis of health and environmental dynamics and challenges.

2. **Fieldwork**: Doctoral Candidates will generate first-hand empirical data in their field(s) of focus through 12 months of ethnographic fieldwork.

3. **Secondment**: Doctoral Candidates will be based at their primary university and then seconded for one semester to their secondary university where their co-supervisor is based

4. **Dissemination**: writing a PhD dissertation, articles and chapters, creating policy briefs, and sharing research findings through various modalities.

Timeline

European Commission

HEALENAE
HEALTH AND ENVIRONMENT IN AFRICA AND EUROPE

The HEALENAE double package

1. Doctoral Candidates will be **enrolled in two universities** and have a main supervisor at their primary university and a co-supervisor at their secondary university

2. Go through **obligatory courses** and requirements at the two universities **+ HEALENAE trainings**

3. **Evaluation** of theses through **both universities' assessment** procedures or combined where possible

4. Candidates will get a **dual or joint degree** (depending on university regulations)

5. Candidates are part of a **cohort and network**

Overall HEALENAE Impact

1. Building an inter-continental research school and network that works **towards equal research relations between Africa and Europe**

2. Continuing to **improve supervision** and widen the scope of **internationalisation**

3. Developing researcher skills and **culture-sensitive knowledge about dynamics between health and environment**
4. **improved employability** and career development in and outside academia

5. **Influencing stakeholders' and policymakers' understanding** of interconnections between health and environment
